ATOMIC ENERGY PROJECT  
POST OFFICE BOX 4164  
WEST LOS ANGELES 24, CALIF.

Dr. Paul G. LaFevre  
Assistant to Chief  
Medical Branch  
Division of Biology and Medicine  
Atomic Energy Commission  
Washington 25, D.C.

Dear Doctor LaFevre:

Thank you for an invitation to the conference on infection and immunity as factors in the reaction to whole-body irradiation.

The state of our research on a possible antibiotic produced through the antolysis of intestinal lactobacilli would make a later date for the conference more convenient for me, and also improve the chances of a more definite answer on this antibiotic project from our laboratory.

However, if the conference is held on February 20, 1953, I still will be very happy to attend at the time and place noted in your letter.

Sincerely yours,

*James G. Vincent*
